Forms:

- Helpdesk Ticket

Participants:

- User
- Assigned Department
- Assigned Team

Process Design

Here is the Process Design.

Helpdesk Ticketing System

What are these suggestions?

Refine Regenerate Form Design

Helpdesk Ticketing System

Start

Assign Department

status == Assigned

Notify Assigned...

End

Diagram description: A process flow for a Helpdesk Ticketing System. It starts with a 'Start' event, followed by a 'Assign Department' task. An 'Assign Department' participant is shown with a grid of icons. A decision diamond follows, with a condition 'status == Assigned'. If true, it leads to a 'Notify Assigned...' task. The process then ends. The interface includes a sidebar for 'User', 'Assigned Department', and 'Assigned Team'. Buttons for 'Refine', 'Regenerate', and 'Form Design' are at the bottom.

## Natural Language to App Logic

Reduce complexity for citizen developers

## Integration with External AI Services

Connect to AI/ML models via APIs

# Joget Advantages

Full-stack app  
development in one  
platform

All-In-One Platform  
Built-in workflow engine + Agent  
Builder (no extra product needed)

Open standards,  
flexible integrations

On-premise/hybrid  
deployment options

Lower TCO,  
simple licensing
